MANAGEMENT OF THE WHITIN MACHINE WORKS

Josiah M. Lasell, a Director; Chester W. Lasell, President; Lawrence M. Keeler, Agent; Sydney R. Mason, Secretary; E. Kent Swift, Treasurer and General Manager; William H. Hoch, Works Manager; George B. Hamblin, Purchasing Agent and Assistant to the General Manager; Ralph E. Lincoln, Office Manager

The WHITIN Spindle

VOLUME 3

WHITINSVILLE, MASS., JUNE, 1922

NUMBER 11

Main Office

In an industrial organization such as the Whitin Machine Works, manufacturers of textile machinery for ninety-one years, with a floor space of approximately thirty-four acres, one would naturally expect a large office force. The Whitin Machine Works has a most modern and well-equipped office building which takes care of the larger part of the office departments.

ADMINISTRATION BUILDING

On the main floor of this building most of the private offices of the management are on the east and north sides, and the rest of the floor space is taken up by the Purchasing, Specification, Accounting and Repair Departments, and the stenographers' and committee rooms.

The second floor is occupied mainly by the sales organization and five private offices, directors' room, assembly hall, and library.

The top floor is occupied entirely by the Drafting Room.

There are other departments which are a part of the Whitin Machine Works office besides these mentioned in the Main Office Building. They include the Pay Roll Department, Production Department, Superintendent's Office, Supply Department, Service Department and Shipping Department.

G. MARSTON WHITIN
Treasurer, 1886-1920

MAIN OFFICE

In speaking of the Main Office force today, it is the custom to refer to those departments located east of the center aisle on the first floor of the building. There are a few exceptions to this rule. In the office photographs in this issue of the "Spindle" we have included those who make up the Management, the Purchasing Specification, and Accounting Departments, janitors, mail and office boys, and telephone operator; and, in the next several months to come, it has been planned to take up the other departments separately.

The personnel included in the section of the Main Office of this

JOSIAH LASELL
Treasurer, 1870-1886; President, 1883-1886

issue consists of thirty-seven members of the office force, whose names and service records appear at the conclusion of this article.

The duties of the departments mentioned are of a nature such as the department names indicate. It is needless to say that a very great amount of raw material is necessary to be purchased through the Purchasing Department for the carrying on of the manufacturing. With the increased number of models of textile machines manufactured by the Whitin Machine Works, together with the individual ideas of each superintendent of the thousands of cotton mills with whom we deal, it is obvious that an order for our machinery must specify in detail what

JOHN C. WHITIN
Founder and First President of the Whitin Machine Works

is wanted, from a special gear to the particular color of paint.

Only those versed in higher mathematics can expect to account for the activities of the Accounting Department, which must make a record of all things from the purchased pencil to the final bill for Whitin machinery completely installed in the largest single mill unit in the world, not omitting the Government income tax, which must be figured. The many phases of the Accounting Department include the cash transactions recorded and handled by the Cashier's Department.

Not least of the important departments are the janitors, who make life worth while in the clean and orderly condition of the building and who are responsible for all incoming and outgoing shop and outside mail.

HUMBLE BEGINNINGS OF PRESENT OFFICE

The present Main Office of the Whitin Machine Works is the result of a constant growth from the days when Col. Paul Whitin was manufacturing bar iron, and later hoes and scythes. Some office work must necessarily have been done in the early days in order to carry on the business. A large manufacturing business grew up in 1812 for hoes used by the Negro slaves on the plantations in the South, and considerable correspondence was necessary.

Members of the Main Office

Colonel Whitin erected the first cotton mill in 1809, three hundred feet north of the dam by the present power house of the Whitin Machine Works. An office was undoubtedly situated in the new brick mill which took care of the hoe and scythe business as well as of the cotton.

In 1826, when Colonel Whitin formed a partnership with his two older sons, Paul J. and John C., to manufacture cotton goods, they built a brick mill on the site of the old forge on the south bank of the Mumford, twenty rods down stream from the present dam by Memorial Square bridge.

MACHINE WORKS FOUNDED

In 1825, at the age of 18, John C. Whitin became a part owner in the business of Paul Whitin & Sons and was made superintendent of the mill and mechanical departments. He had been early impressed with the imperfections of the machinery used, especially that used in picking cotton, and in 1830, with two lathes not worth more than \$15 each, completed the first picker in about a year and applied for a patent. In 1832 the patent was returned granted. The picker attracted the attention of other manufacturers, and for the first time the firm of Paul Whitin & Sons went into the manufacture of machines, using as a shop the picker house of the cotton mill, a building

32' x 40'. Other machines were later built by Mr. Whitin, and in 1847 the New Shop, as it was called, 306' x 102', two stories and a basement, was built on the north side of the river.

The office work connected with this business was carried on until 1863 in the building now used as an office by the Whitinsville Cotton Mill and the grocery store of Herbert Dudley.

The two other sons of Paul Whitin, Charles P. and James P., had in the meantime become partners in the firm.

COTTON MILL AND MACHINE WORKS OFFICE SEPARATE

In 1860 John C. Whitin purchased the Holyoke Machine Works on his own account. In 1863 the four brothers composing the firm of Paul Whitin & Sons dissolved partnership and divided up the business under their control. In this division John C. Whitin was given the machine shops and the following year sold out his interest in the Holyoke Machine Works and commenced building a new shop parallel with the shop of 1847, north of it, which is 475' long and 70' in width, three stories and a basement. The office was moved to a temporary building near the west end and north of the 1847 shop. The personnel of the office, at that time, included John C. Whitin, Josiah Lasell, who came to Whitinsville

from the Holyoke Machine Works where he went from Lasell Seminary to take charge for Mr. Whitin, and David B. Chase, who was also book-keeper for Mr. Whitin at Holyoke.

FIRST PERMANENT OFFICE OF J. C. WHITIN MACHINE SHOP

In the spring and summer of 1866 the interior furnishing of the new office in the northeast end of No. 2 Shop was completed. R. K. Brown worked on this and came to the attention of Mr. Whitin, who sent him to business school in Worcester. Mr. Brown returned to the Whitin Machine Works in the winter of 1866-67. He had the experience of moving into the new office with Mr. Whitin, Mr. Lasell, and Mr. Chase.

The diagram of the 1867 office, showing the location of the desks of the men mentioned, can be found in this issue. Mr. Brown's memory of the exact location of the office at that time was verified by an old drawing which was located in the Drafting Room and which we reproduce here. This drawing includes that space now occupied by the Cashier's Department.

Josiah Lasell was of great assistance to Mr. Whitin in the transaction of the business; and, when Mr. Whitin's health made it necessary for him to give up his accustomed activity in the daily work, Mr. Lasell was counted on to fill his place. Mr. Brown, in

Office of 1867

1866, was given the desk occupied by Josiah Lasell, as shown in the drawing, next to Mr. Whitin, who did most of his work at an extension desk. Mr. Brown waited on Mr. Whitin continually and for six months took him about the Works in a wheel chair. The task of wheeling him about was later taken over by another man.

WHITIN MACHINE WORKS
INCORPORATED IN 1870

In 1870 the business which had for six years been owned by John C. Whitin was incorporated a joint stock company under the present name of the Whitin Machine Works. The officers were: president, John C. Whitin; treasurer, Josiah Lasell; superintendent, Gustavus E. Taft.

Mr. Whitin died on April 22, 1882, and Charles P. Whitin, a director, was appointed president pro tem. Mr. Lasell became president and treasurer at the next annual meeting of the stockholders, held January 15, 1883. In 1882 Chester W. Lasell began to learn the business in the Whitin Machine Works and spent two years in the various departments. In 1884 he was placed in the office and helped Mr. Brown, who was carrying on David P. Chase's work, who died in that year. In the early part of 1885 W. E. Johnson was added to the office to look after the payroll and other office duties.

In 1884 Mr. Brown visited Europe, and in his absence G. Marston Whitin

came in from the Superintendent's Office, where he had served as assistant superintendent for two years, to look after Mr. Brown's work in his absence. Mr. Whitin soon assumed the duties of an assistant treasurer and on January 22, 1886, became treasurer. On the death of Josiah Lasell, March 15, 1886, C. W. Lasell became president, which position he holds to this day.

Josiah M. Lasell entered the office in the late summer of 1886 and very soon afterwards was made assistant treasurer.

OFFICE ENLARGED

The next addition to the personnel of the office occurred in 1890, when

A. A. Simmons came to the office as assistant to Mr. Johnson on the payroll. In that same year the partitions between the office and the Drafting Room were taken out, and the east end of the building was made into one complete office more than twice its original size. Previous to this time all incoming and outgoing freight was handled through the double doors at the east end of the building between the office and the Drafting Room, but with the laying of the railroad tracks the handling of the freight was transferred to the west end of the building.

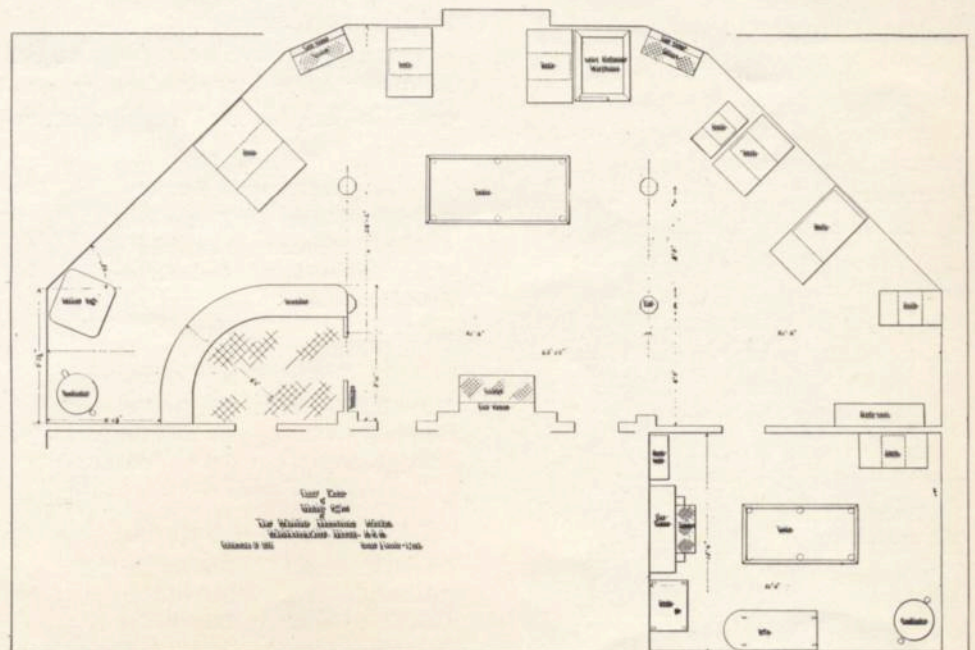

In February, 1891, Miss Susan M. Pollock joined the office and has the distinction of being the first woman to work in the Whitin Machine Works in either shop or office.

In 1895 Mr. Simmons was made cashier of the Grafton Bank and until 1911 acted as auditor for the Whitin Machine Works. Arba Noyes took his place on the payroll in 1895. In the same year the first stenographer employed by the Whitin Machine Works, George B. Hamblin, became a member of the office.

In 1900 the personnel of the Main Office consisted of G. M. Whitin, Chester W. Lasell, Josiah M. Lasell, R. K. Brown, George B. Hamblin, Arba S. Noyes, Susan M. Pollock, Elizabeth Clifford, Harvey Goodell, followed in a few years by E. K. Swift, L. M. Keeler, R. E. Lincoln, and H. H. Bullock.

Josiah M. Lasell resigned as assistant treasurer on January 16, 1905, and the following year at the directors' meeting, January 15, 1906, E. K. Swift was made assistant treasurer. Lawrence M. Keeler, who started his

Safety

Eleven of the nineteen working days in May were "No lost-time accident days." Every one of the carpenter jobs scored 100% in May, with no loss of time for the month. We have thirty-five departments which have not had a lost-time accident since January first. The number of injuries requiring an employee to stay out has been decreased over 45% as compared with the 1921 record. The number of infections has been decreased, and there is much less loss of time from infection.

While there are many reasons that enter into this big improvement, one may be cited: we have not been taking on many new men. Hence, it may be well for each of us to feel it our duty to assist the newcomer, whenever and wherever he may be, by warning him of danger and helping to protect him against injury until he acquires ability and experience.

We are steadily improving our safety records, and a prompt use of the hospital and its facilities for every injury, however small, will be a great

help in continuing to lessen our injured list.

English Classes Complete Second Year

The English class held in the Apprentice Room during the past year closed its second season with a very satisfactory record in the course of study and in attendance. A larger percentage of those who enrolled in the fall completed the course than in the first year. There were three divisions, one for beginners who could neither read nor write English, another for those who wished to become more efficient in the use of English, both oral and written. The third group studied the Constitution of the United States and the steps that are necessary to become a citizen.

Certificates have been given to the following men for satisfactory progress in English and regular attendance:

BEGINNER'S ENGLISH

Adelard Audette	Hector Fortin
Arthur Baillargeon	Lomer Leveille
Henry Bowman	Arsin Oviau
Felix Deschene	Misrael Roy
Elzear Fortin	Haig Vartebedian

SECOND-YEAR ENGLISH

Jacob Burghgraef	Gerrit Minkema
George Dykstra	Archie Pilebosian
Harry Kalagian	John Wiersma
	Frank Zayonc

CITIZENSHIP CLASS

Joseph A. Coté	Hubert McNeil
Adelard Godbout	Steve Ozog
Daniel D. Gonlag	Donat Picard
Henry Koerten	Arthur Roy
	Frank Rybak

Radio Club Builds Wireless Telephone with Tested Range of 500 Miles

The Whitinsville Radio Club completed a radio set in the latter part of May from which they have received concerts from Worcester, Springfield, Newark, Pittsburgh,

Medford Hillside, and Providence. We are showing a photograph of the set above. Most of the credit for the set itself should be given to Herbert Meek, of the Quality Electric Co., a former employee of the Whitin Machine Works. Charles A. Allen, of the Employment Department, made the case in which the parts are installed. During the summer months the results from radio will not be as great as can be looked forward to in the fall and next winter.

Our sympathy is extended to Helena Roche, of the Main Office, on the death of her mother, which occurred this month.

James Ferguson

Forty-nine years ago last month, James Ferguson started to work for the Whitin Machine Works. He has been recently pensioned off, due to ill health. He first went to work for William Foster on spoolers; he was placed on the spinning job under James Pollock in November, 1873, and has been a member of that department ever since.

Another member of the spinning job, Samuel Magill, was placed on the pension list, due to ill health, last month. Mr. Magill has been employed for thirty-seven years and has spent all of this time on the spinning job or on the road.

Robert Brighty, of the spinning job, who was recently retired, has completed forty-nine years of service. The majority of the years in which he was employed in the Whitin Machine Works were spent under Foremen John Snelling and John Wood.

Two Apprentices Graduated This Month

Philip Kuekan, of the tool job, began his apprenticeship when he entered the shop in September, 1919. His first experience was gained under F. E. Bates on the spinning setting-up job. He has worked on the ring job under H. B. Stuart, on the moulding-machine job for C. M. Stuart, on the bolt job for E. H. Hilt, for S. W. White on doffers, for L. J. Ramsey on speeder work, and finished his apprenticeship with Robert Deane on the tool job.

Kuekan has done well on the different departments where he has worked, and his work in the Apprentice School has been good throughout the three years of his service. He completed his apprenticeship on June 3, 1922.

Henry Pariseau completed his apprenticeship on the tool job May 20, 1922. He entered our shop on the ring job in January, 1919, and very soon after decided to serve as an apprentice. He was enrolled on May 19, 1919, and by regular attendance was able to complete his three years, service by the twentieth of May of this year.

Pariseau has done very good work on the various jobs where he served his apprenticeship, and his record in the Apprentice School was good. He has worked on card work under A. R. Fletcher, on drawing frames under W. J. Johnston, on milling under E. H. Hanny, on repairs under J. W. Dale, and on the tool job under Robert Deane.

William Leonard

William Leonard, with a service record dating back to 1867, was among those who retired this spring. Mr. Leonard would have completed fifty-five years of continuous service in the Whitin Machine Works in September of this year. A detailed account of his service record can be found in the March, 1920, issue of the "Spindle," Volume 1, Number 8.

A New Address

Waiting vl.,
Machine Shop,
Waiting vl.,
Mass.

A letter addressed as above was received in the Main Office recently. This is a new way of addressing our firm, and the postal authorities should receive credit for being able to send the letter to its intended destination.

Dewey Veau, of the yard, has a new Ford. Like its master, it gets stuck in Douglas now and then.

Philip Kuekan

During the past business depression it has been a common thing for our service manager, William T. Norton, to be stopped on his way to and from his work and in the office and to be asked the question, "What are the chances for a job?" He has answered this question so many times that the term, "Nothing doing," has come almost automatically to his lips. The expression has now been twisted to "Norton doing" by those still seeking employment. With business picking up the country over, we all may rightfully be more optimistic than ever.

Henry Pariseau

James Kiernan

Blair and Kiernan Complete 50 Years' Service

The twenty-fifth and twenty-sixth fifty-year service pins were presented June 15 to W. G. Blair, foreman of the planer job, and James Kiernan, bench moulder of the Foundry. Each completed fifty years' service in June, and they were presented their pins by Superintendent A. H. Whipple in the private office of the treasurer, E. K. Swift. This makes seventeen of the fifty-year men in active service and nine retired.

Mr. Blair joined the Whitin Machine Works as an apprentice on June 18, 1872. As an apprentice Mr. Blair worked under Warren Smith on rolls, Charles Pollock on painting, Henry Warfield on looms, Howard Burbank and Henry Flanagan on cards. After finishing his apprenticeship he worked under Howard and Malcom Burbank on cards and looms, and for nine years under William Dixon on tools. On the first day of April, 1888, he was put in charge of the planer job and was the last foreman to be appointed by Gustavus Taft, who died in June of that year.

James Kiernan has been a moulder in the Foundry for fifty years. He completes at this time fifty-four years of continual moulding. We believe that this is a record hard to beat by anyone in this trade and would welcome knowledge of a similar record. He served his apprenticeship in the Draper Corporation, and four

years later he came to Whitinsville and was at once employed as a moulder in the Foundry. We were melting at that time about five tons a day.

The day before Mr. Kiernan received his fifty-year pin he informed us that he poured sixteen ladles of iron. In the fifty years which he has worked for the Whitin Machine Works he has not been on day work a single day, but has always worked at piece work. Mr. Kiernan, on receiving his fifty-year pin, remarked to Mr. Whipple, "This represents fifty years of contentment."

William G. Blair

Mr. Kiernan has been very active in the community life of Whitinsville, having held several town offices, and is a charter member of several societies in town.

A more complete detail of their service records can be found in the March and April "Spindles" of 1921, Volume 2, Numbers 8 and 9.

There was a famous fishing party at Chatham Beach a few weeks ago. On a Saturday afternoon the boys spent several hours fishing. Charlie Burlin, foreman of the Blacksmith Shop, and George Gill, foreman of the roll job, started in to count the fish about 7.30 p. m. Charlie was completely tired out by 8.10 p. m. and retired. He awoke about 2 a. m., after a wild fight with several sharks in his dreams, to find George in the kitchen still counting fish. Charlie informs us that they had got as far as 100 when he went to bed.

Hazel Anderson, of the Employment Office, a June Bride

Hazel Anderson, of the Employment Department, was married Saturday, June 10, to John Gillis, of Uxbridge. Mr. Gillis is assistant superintendent of the Worcester Suburban Electric Co., of Uxbridge, and an overseas veteran.

Miss Anderson has been a member of the Whitin Machine Works office force since August, 1919, during which time she has been connected with the Employment Department. The newly married couple spent their honeymoon on an automobile trip to Canada, through New York State. We wish Mr. and Mrs. Gillis every success in married life.

With the coming of the summer season we notice that the girl athletes of the Main Office have taken up swimming and tennis for recreation. The young ladies, as yet, have not published a schedule of their evenings at the pond.

Mary Cook has been talking seriously lately of purchasing a saddle horse for her personal use. Her many friends are submitting original designs for her riding suits, and it is understood that she will be thoroughly booted and spurred.

Shower at Uxbridge Inn for Miss Anderson

Hazel Anderson, a member of the Employment Department, had occasion to enter the parlor of the Uxbridge Inn with her mother, Friday evening, June 2, at eight o'clock. She was completely surprised to find sitting there, when the lights snapped on, twenty-four of the young ladies of the Main Office. After extending congratulations to Miss Anderson on her coming wedding, the group adjourned to the dining hall, which was beautifully decorated in pink and white.

Miss Anderson was presented with an opal lustre tea set by her friends present.

Left to right—Henry Bradbury, John Leech, John Horrocks, Christopher Horrocks

Fifty-Year Veterans from Pittsburgh, Pa., Visit the Shop

The Whitin Machine Works had a very interesting visit Monday morning, June 19, from two brothers who have served fifty-three and fifty-four years in industries of Pittsburgh, Pa. The Whitin Machine Works came to the attention of the Horrocks brothers last January when they read in the "Spindle" about the fifty-year men of this concern, and they determined at that time to visit one of their friends, John Leech, in Whitinsville, and to see the works where such a record had been established.

The oldest brother, John Horrocks, age 79, has been employed by the Crescent Steel Works Branch of the Crucible Steel Company of America, at Pittsburgh, for fifty-four years, at hammering and welding cast steel.

His brother, Christopher Horrocks, age 73, has been employed by the Westinghouse Air Brake Company, of Pittsburgh, for fifty-three years and is secretary of the Veterans Association. A letter from Mr. Horrocks appeared in the March issue of the "Spindle" of this year, telling about the Veterans Association of the Westinghouse Air Brake Company. Christopher Horrocks was the first mechanic employed by George Westinghouse, the founder of the great Westinghouse concern, and worked side by side with him at the bench. He is the oldest employee of the company. Mr. Westinghouse always considered Chris, as he called him, one of his closest friends and left a re-

quest that at his funeral Mr. Horrocks should be one of those to lower his remains into the grave.

The two Horrocks brothers were accompanied by Henry Bradbury, age 72, a contractor and builder of Fall River, and John Leech, age 72, one of our retired fifty-year men. The quartette were boys together in England and, as Mr. Leech says, attended the same Sunday School. Eight years ago Mr. Bradbury visited Pittsburgh, which was the first time he had seen the Horrocks boys since they left England, and Mr. Leech, after sixty years, had the opportunity to become acquainted with the two brothers during the week-end of June 17.

Christopher Horrocks worked for the father of Samuel Moss, second hand of the polishing job, in the old country.

We were very glad to welcome the representatives of the Veterans Associations of two other companies. Their past connections with several of our employees, and with one of our fifty-year men, made them doubly welcome. We trust that they may live to see many more years of active service.

Harry Wallace, the champion checker player of the Whitinsville Checker Club, played a match at the Woonsocket Checker Club with I. L. Davidson, champion of Rhode Island. Mr. Wallace won seven, lost six, and drew seven.

The following week he defeated George Maberry, champion of Worcester, at the Woonsocket Checker Club. Mr. Wallace is playing this month a match of one hundred games with Earl Wales, champion of the Woonsocket Checker Club.

Four Important Events Crowd into One Month for Hugh Ferguson, No. 2 Office

Hugh Ferguson has had an extremely busy and important month. On the twenty-fifth of May he became a grandfather for the second time. On the third of June he celebrated his birthday. On the fourteenth of June Mr. and Mrs. Ferguson entertained at their home on the occasion of their twenty-fifth wedding anniversary, and on the twenty-second of June he completed forty years of service in the Whitin Machine Works.

We consider this, on top of the ordinary duties in the shop, a mighty busy month, but we do not see but that Mr. Ferguson has weathered these occasions exceptionally well. He also has the distinction of never having had a lost-time accident in the forty years he has been connected with the Works.

Mr. Ferguson tells us that his daughter Dorothea, who is a former member of the Main Office, has named the new baby Nancy Wheelock Shute.

Mr. and Mrs. Hugh Ferguson Celebrated Silver Wedding, June 14

On May 20, at the Blue Eagle Inn, Victor L. Townsend, of Waltham, played nineteen boards in an exhibition tournament at checkers. He won sixteen of the matches and drew three. Those of the Whitinsville Checker Club who drew with Mr. Townsend were Harry Wallace, John Minshull, and Leslie Rogers.

Mr. Townsend then demonstrated his ability to play four men blind-folded. He won three of the four matches. Those who lost were Austin Melia, Edward Borow, and Arthur Roy. Harley Keeler drew with him.

Industrial Triangle League

Whitin Machine Works Team Looks Stronger This Year Than Last

Favorable comment concerning the Whitin Machine Works baseball team in the Industrial Triangle League has been expressed by all the fans, and, together with the new field and the good playing of the team, the support from the baseball followers has been very good this season. The team should finish the season at the top of the league.

W. M. W., 20; Whittall, 3

After an unfortunate start in which the Whitin team was defeated by the Chase Mills 3 to 2, the Whitin team turned around and trounced the Whittall Carpet Company 20 to 3, on May 20. In the first inning we scored five runs on four hits and three errors, McKee, the seventh man up, getting a three-bagger. The team batted around, Steel flying out to left field for the final out. In the seventh inning Steel batted twice when Whitins chalked up six runs. The inning was featured by Whitins' securing two singles, two two-baggers and a home run. The home team didn't play as tight a game as the Saturday before, the Whittall people scoring three runs on errors. Steel allowed two hits and struck out nine men.

W. M. W., 10; A. O. C., 8

The American Optical Company went down to defeat before the onslaught of the Whitin Machine Works team on their home field in Southbridge. The final score was 10 to 8. Whitinsville jumped into the first inning with the same dash with which they tackled the Whittall Carpet Company. Ashworth started it off by hitting the first ball pitched for a home run, duplicating his stunt of last year in the first game with Southbridge at Southbridge. Kiernan followed Ashworth

Below the Clinton Reservoir Dam
Photo by George Tebeau, Metal Pattern Job

with a three-bagger, and Donovan followed him with a single. "Ducky" Leonard, who played with Whitinsville for the first time this season, singled, advancing Donovan; and both scored later on a single by McKinnon. The American Optical team took advantage of Steel's temporary wildness, he passing two men in the first inning, which, followed by a two-bagger and a single, re-

sulted in three runs before he settled down. He struck out the last two men who faced him.

After the team had batted around in the first inning, Ashworth started the second inning with another home run. Kiernan reached first base on an error, Donovan sacrificed him to second, Hartley flied out, Leonard singled for the second time, and Denoncourt's hit scored Kiernan and Leonard. Both teams secured two runs in the fifth inning.

This ended the scoring for Whitins, and the American Optical team were able to score one run in the sixth and two in the eighth. Steel wound up the game by striking out Martel with two on bases.

W. M. W., 13; CHASE MILLS, 3

The Chase Mills team, of Webster, put up a fine exhibition of baseball for five innings on the Whitinsville grounds Memorial Day. The score was 1 to 0 in favor of our boys at the end of the fifth. For the third consecutive game the Whitin team scored in the first inning. In the sixth inning the Chase Mills team completely cracked, allowing four runs on four errors and one hit, and in the seventh inning Whitinsville took advantage of Chase Mills' continued weakness and with six hits and four errors and a base on balls succeeded in scoring eight runs. It was one of the most pathetic innings of baseball witnessed in Whitinsville for a long time. The Chase Mills team tightened up in the eighth inning and retired the side in 1-2-3 order.

SLATERS, 7; W. M. W., 5

In the fourth game of the season played in Webster, on June 10, the Whitin Machine Works were defeated 7 to 5. This was a great surprise to the followers of the Whitin team, but evidently Steel had an off day, having to be relieved in the fourth inning by Malgren. Steel had been out of the game two weeks due to a split forefinger of the right hand and undoubtedly was less effective than he should have been. Malgren held the Webster team to one run after taking Steel's place. Following their established custom of the season so far, our boys scored their first run in the first inning, Donovan knocking in Ashworth. Webster took the lead in the second inning, and Whitinsville took it away from them in the third, the score standing three to two until the fatal fourth. Webster secured four hits off Steel, followed by a base on balls and a three-bagger by Lonergan. This was a signal for taking Steel out of the box, and Malgren retired the next two men.

W. M. W., 9; HAMILTON, 1

On Saturday, June 17, the game against the Hamilton Woolen people proved easy for Whitins, which won 9 to 1. In the second inning the Whitin team scored three runs, and then after an intermission of twenty minutes, due to rain, came back and added four more to the total, making seven in all. The Hamilton team secured their only run in the sixth

The Clinton Reservoir Dam
Photo by George Tebeau, Metal Pattern Job

inning, when Steel allowed a hit and, with two men out and three on bases, walked Beaudiro. In the fourth inning, with a man on base, Kiernan saved what might have been a home run, at the edge of the center-field woods, by a remarkable catch over his right shoulder. The fans gave Kiernan a great hand when he came in from the field. Denoncourt played a stellar game at shortstop. Steel allowed five hits and struck out seven men. Hartley did the heavy hitting for the home team, securing three hits out of four times at bat.

W. M. W., 6; DRAPER, 1

The twilight games with Draper Corporation and Fisherville proved of tremendous interest to the fans and showed the general caliber of our baseball team.

Whitinsville had little trouble in defeating Drapers 6 to 1. Until the seventh inning the game was very close, and both teams were pretty evenly matched; but in the seventh and eighth Whitinsville had little trouble in scoring.

W. M. W., 8; FISHERVILLE, 1

Fisherville had as much difficulty in holding the Whitins team as the Draper Corporation, the final score being 8 to 1 in favor of Whitins. McKinnon did the heavy hitting for the home team, securing a single, a double, and a triple. Steel, pitching for the Whitins team, allowed Fisherville three scattered hits.

The fans will follow baseball as long as the playing is snappy and full of punch, as they have shown this season. After sitting through a Twilight League game Monday and Wednesday evenings, they will turn out over 400 strong to witness an exhibition game between Draper and Whitinsville. This same interest was shown in the Fisherville game the week following, and it is expected that an out of town team will be invited to Whitinsville every Thursday night for the rest of the season, if arrangements can be made.

Sunset League Teams

Are Playing Good Ball Before Large Crowds, Monday and Wednesday Nights

Reference was made in the last "Spindle" to the first two games of the Sunset League. Beginning in this issue on Monday, May 15, the Foundry defeated the Pickers in a close contest, won in the last inning by the score of 6 to 5. The Pickers took the lead in the first inning of the game, but were overcome in the second when the Foundry piled up three runs. In the first of the fifth the Pickers again took the lead, scoring three runs which were due chiefly to three-baggers by Steel and Ashworth. The Foundry tied the score in the same inning through heavy hitting by Leonard, who got a two-bagger, and Saragian, who scored him with a three-bagger and scored later in the inning. In the sixth inning Jones struck out two of the three batters to face him, Corron flying out to center field. The Foundry came to bat, and Freitas started off the inning with a two-base hit and scored later on Jones's single, Jones winning his own game.

Clambake Season is Here. The Pattern Makers Are Scheduled for a Ten Year Reunion Next Summer.

The Yard defeated the Spinning Job, Wednesday, May 17, 4 to 1. The game was tied, 1 to 1, until the fourth inning, when the Yard scored three runs through heavy hitting by Campo, McKinnon, and Hartley and errors by the Spinning team.

On Monday, May 22, the Yard defeated the Pickers 5 to 2. The Yard was never in danger, scoring four runs before the Pickers got under way. Buma's three-bagger in the third inning for the Pickers proved to be of no use. This was the only really heavy hit of the game. Hartley, for the Yard, struck out eleven men, and Malgren, for the Pickers, struck out ten.

On Wednesday, the twenty-fourth of May, the Spinning Job upset the Foundry by defeating them 5 to 3. This was a general surprise. The Foundry led until the sixth inning. In the third inning Bill Britton, of the Foundry team, put the ball into the woods, and unfortunately there was no one on base ahead of him, thus counting only one run. In the sixth inning the Spinning Job got to Anderson's delivery. Kane led off with a single, followed with three-baggers by Hughes and Nash. Nash scored the third run on a sacrifice hit by Finney.

The Spinning Job continued its winning streak by defeating the Pickers 6 to 4 on Monday, June 5. All the scoring was done

in the first six innings, and the Pickers in the last two innings were put out in 1-2-3 order.

Great interest was shown in the Foundry and Yard game on June 7. It was estimated that between four and five hundred people witnessed this game. The score stood 1 to 0 in favor of the Yard until the third inning; then the Foundry began to hit Hartley, never letting up and scoring in every inning thereafter, totaling eighteen hits for fourteen runs. The Yard secured eight hits off Jones's delivery for a total of five runs. Veau, Leonard, and McKee were each credited with three hits out of five times at bat.

On Monday, June 12, the Yard broke the winning streak of the Spinning Job, defeating them 14 to 8. Hall, of the Spinning team, had a perfect batting average for the evening, getting four hits out of four times at bat. "Buck" Herberts showed some of his old-time form by securing three hits out of five times at bat, one being a slashing two-bagger.

The Pickers took another defeat from the Foundry by the score of 14 to 5, in eight innings, on Wednesday, June 14. The Foundry secured sixteen hits in getting their fourteen runs, many of the hits being for extra bases. McKee got two three-baggers and two singles out of five times at bat. Jack Leonard was credited with two singles and a three-bagger in five times up. Malgren hit Jones for a home run in the first inning, followed by another by McGuire in the second inning. After that, Jones settled down and didn't allow another run to the Pickers and allowed them but four hits in the next six innings.

Odd Items

Last year's champions, the Pickers, have gone into a decided slump this year, winning only one game out of five played.

It looks as if the championship of the league was in dispute between the Foundry and the Yard, but in the last game between the two teams the score was so decidedly in favor of the Foundry that the odds are strongly swinging in that direction.

Jones, for the Foundry, has yet to lose a game and has been instrumental in winning several by timely hitting.

Interest in baseball this year has improved tremendously. One of the strong factors is the new ball field and the bleachers. After considerable discussion, and a thousand opinions about the laying out of the field, the results are meeting with approval everywhere.

The hottest game of the season for the fans was played Memorial Day, when the temperature must have been around 100° in the bleachers. Since that time the weather has been more favorable, with the exception of the Hamilton Woolen game of June 17, when the fans retired under the bleachers for twenty minutes to keep dry.

If the Whitinsville team of the Industrial Triangle League could play all its games at home, from all present indications they would have no trouble in cleaning up the league. The backing of the fans seems to have had a great effect toward heavy hitting, as every game played on the home grounds has been a swatfest for our boys.

Sunset League Starts Season with Heavy Hitting

The batting averages of the Sunset League this season are higher than in seasons past. This is due in a large extent to the fact that Steel and Murray have been barred from pitching in the league. In so doing, the teams are more evenly matched than they would be otherwise, and there is a good deal more action in the game, due to the increased number of hits. The batting averages for the Sunset League and the standing of the teams are as follows:

SUNSET LEAGUE STANDING WEEK ENDING JUNE 17

Napoleon Barber, a member of the spindle job, brought in twelve exceptionally large and well-formed strawberries from his garden in Plummers. The largest strawberry had a diameter in length and width of $1\frac{1}{2}$ inches. The strawberries were of the Glen Mary variety. Up to the fourteenth of June Mr. Barber had picked fifteen quarts of berries from his patch.

Whitin Home Garden Club Appoints Supervisors of 180 Gardens

The president of the Whitin Home Garden Club, Harley Keeler, obtained a list containing the names of the gardeners and the location of the gardens connected with the Home Garden Club. Daniel Duggan, of the Yard Office, submitted the names to the president of the club from his list of gardens given out by the shop. The gardeners this year have more time than usual to work the soil, and the Home Garden Club is looking forward to the best show of its existence this coming fall. The supervisors of the different districts have been appointed as follows:

Mystery Picture

We made it easy last month, and almost everybody guessed Jack Welch, foreman of the speeder job. Try this one, and let M. F. Carpenter register your guess.

Morgan Memorial Truck with 63 bags of clothing, 21 pieces of furniture, from Whitinsville contributors. Lee McFarland and George S. Dyer, of the shop, helped the Morgan men collect.

“Bugs from the Cupola”

Manager Dorsey says he has a ball team that looks like a million. He has engaged “Bill” Regan to coach, and the results are wonderful.

We are getting ready to form a glee club this coming winter. “Bill” Campbell, with his saxophone, can be heard daily blowing away, while “Jack” Haggerty saws away on his violin. Before long we expect to give a concert that will make the public sit up and take notice.

Burt Hill caught some beautiful trout last week. He had fourteen in all; most of them were ten and twelve inches long. It sure was some string, but he woke up to find that it was only a dream.

Gert Bosma has gone into the fish business with “Louie” Carr. He seems to be a favorite with the women, for “Louie” says his sales have increased since Gert started to peddle with him.

“Bart” Connors and “Jack” Strachon are working Saturday mornings lately. They are not crazy about the job, but it is something that had to be done.

“Bill” and “Ed” have started to overhaul automobiles in their spare time. They are looking for a truck that will tow the car along after the bearings and piston rings have been removed. They don't believe in loose bearings and leaky piston rings.

The Blacksmith Shop is still arguing the question whether one can extract blood from a turnip, and have decided to leave the decision in the hands of Judge Burlin. The prosecuting attorney is Arthur Richardson and the defendant Merwin Brown.

Construction of No. 14 Shop Photographed by Damour from Tower

Joseph Damour, of the electrical job, climbed the mortar towers recently erected by the Aberthaw people for No. 14 Shop and the new garage and took several pictures, which we reproduce here. Joe claims that it was not as difficult a task to climb these towers as it was to climb the one used in the construction of the new Carpenter Shop. You tell us, Joe. We won't dispute you.

Al. Porter, of the Blacksmith Shop, has been laying the foundation for a new garage. For dimensions, Albert has been accused of using a baby carriage as a gauge, building the garage three times as long and two and one half times as wide; but the question in the minds of those who are watching the process is,

This picture has been received; it is of a member of the milling job at the age of three years. Those who are exceptionally good at guessing will find an interesting subject here.

Why the necessity of leaving the baby carriage in the middle of the garage while the building is under construction, especially after the measurements have been acquired?

Again in connection with the fishing party at Chatham Beach, the boys tell us that in the flooded cranberry bogs they saw numerous fish fins sticking out of the water. Mr. Gill was persuaded that they were white perch and spent considerable time using all kinds of bait trying to entice them. It is pretty certain that George was not brought up in New Brunswick and was never introduced to that species of fish known as herring.

Elaine Brown, of the Production Department, and the Masons pay a visit to President Harding and his Secretary, Mr. Christian. The outline of Jeanie Scott can be noticed behind the gentleman in uniform. May Britton is hiding behind the detective at Mr. Harding's right.

Office Notes

James Cooper, salesman and spinning expert for the Whitin Machine Works, on June 13 started out real early to visit a mill in a southern part of New England. Just as the train pulled in, Mr. Cooper reached for his bag, but couldn't find it. Returning on the trolley car, he was met by George Wilmot, foreman of the freight house, who passed the remark that it was a pretty early hour to be coming. Jim replied that he was going, but left his bag at the office. In a few minutes George noticed Jim give a peculiar start, and on being questioned Mr. Cooper stated that he remembered leaving the bag on the rack under the ticket window. The next train out found Mr. Cooper going south.

James Boyd, of the sales force, was in a hurry lately and, as the elevator was handy, jumped in and pressed the buttons. A few seconds later the elevator stopped between floors and refused to move. Your voice is O. K., Jim, and would qualify you for a public speaker.

The automobile bug has reached the Main Office. Among those who have recently taken out their licenses and who own cars are Gladys Hanny, Catherine Munt, and Eugene Beau-dry.

Jennie Scott has established a new Tonsorial Department in the Main Office, and is especially quick in executing stray locks of the crowning glory of the ladies. "Gwennie" Searles was among her first customers and highly recommends the artist in her new profession.

"Sis" Brown, of the Production Department, is learning to shift gears in her Chevrolet, and we expect her to be before the examining board in a very short time.

Main Office

Continued from page 5, column 3

apprenticeship in September, 1891, serving in the shop and on the road, was connected with the No. 2 Office and Main Offices from 1895 and appointed agent of the Whitin Machine Works in 1906.

W. E. Johnson in the early nineties was relieved from the full responsibility of the payroll work and moved into No. 2 Office. His work in that office included the purchasing of supplies, in which he was assisted for several years before his death, in 1907, by George B. Hamblin. In 1907 Mr. Hamblin was made purchasing agent and has in recent years been assistant to the general manager.

In 1915 G. Marston Whitin, because of failing health, was obliged to give up a large part of the responsibility as treasurer and general manager of the Whitin Machine Works, and, until his resignation in January, 1920, practically all his work was carried on by Mr. Swift. On January 26, 1920, Mr. Swift was elected treasurer and general manager of the Whitin Machine Works.

On December 8, 1920, George Marston Whitin passed away. He had been treasurer of the Whitin Machine Works since January, 1886. It was said at that time that "Mr. Whitin in his management of the Whitin Machine Works displayed unusual ability and business sagacity. The growth and development of not only the Whitin Machine Works, which increased threefold under his direction up to its present size, but also the prosperity of Whitinsville, stand today as a tribute to his courage and foresight as a builder. Mr.

Whitin brought to his work a great personal energy and unusual attention to detail. He had very much at heart the condition and happiness of the individual workmen and is responsible for the model industrial village which has been built in Whitinsville. Mr. Whitin was also very intimately and widely connected with the cotton textile industry, and his advice was frequently sought in matters of policy and direction."

With the rapid expansion of the business it became necessary to build a new office building in the spring of 1917. This building was occupied in May, 1918, by the office force.

On January 21, 1918, Sydney R. Mason, in charge of the Repair Department, also became an officer of the Whitin Machine Works by being elected secretary at the directors' and stockholders' meeting.

On his return from the army in June, 1919, W. H. Hoch was appointed works manager. Mr. Hoch joined the Whitin Machine Works in 1909 and served his apprenticeship in the shop. His work was closely related to that of the management before he enlisted in the United States service.

Whitinsville To Have a World War Memorial

As we go to press, a large committee of solicitors for the World War Monument Fund in Whitinsville are just completing a campaign for the new monument which is to be located in Memorial Park. The solicitors are working under a general committee composed of Josiah M. Lasell (chairman), Herbert Dudley (treasurer), Joseph Johnston (secretary), W. O. Halpin, Arthur Whitin, Harry Phipps, and Charles R. Ward.

The following people composed the solicitors:

HILL STREET—Mrs. Charles A. Browning, 115; Mrs. R. E. Lincoln, 121; Robert G. McKaig, 103.

MAIN STREET TO NO. 76—Blue Eagle Inn, Mr. and Mrs. S. C. Durrell, Mrs. Sadie McNeil; H. E. Keeler, 18; George F. Hanna 28; Katherine Regan, 60; Mrs. James R. Ferry, 48; Mrs. James A. Brown, 59; Miss Mary Britton, 51.

MAIN STREET BEYOND NO. 76—Frank Fredette, 78; Patrick T. Duggan, 116.

FOREST STREET—Aaron A. Adams, 8; Mrs. W. F. Tibbetts, 13; Mrs. W. J. Sherry, 27; William J. Walker, 16.

THE ANNEX—Mr. and Mrs. Willis Winchenbach; Mr. and Mrs. Harry Moore.

GROVE STREET—Mr. and Mrs. J. T. Cahill, 21.

HIGH STREET—Lawrence J. Ramsey, 7; James T. Kearnan, 9; Mrs. B. R. Graves, 62.

LINDEN STREET—H. O. Nelson, 19; Mrs. Henry A. Owen, 25.

CHESTNUT STREET AND UPPER HIGH—Charles S. Snow, 68.

MAPLE STREET—Mrs. Andrew Baird, 16; John A. Johnston 5; Michael Duggan, Jr., 10.

CENTRAL, WATER AND WEST WATER STREETS—George Broadhurst.

OAK STREET—John B. Riley, 10; Thomas Carroll, 12.

WEST STREET—Mr. and Mrs. Wm. H. Ashton, 4.

ARCADE STREET—Mrs. George Ferguson, 2; James Spence, 9.

CRESCENT AND LAKE STREETS—Daniel C. Duggan, 5 Crescent; William T. Walsh, 20 Crescent.

OVERLOOK STREET—Albert Faber, 28; Mrs. Hannah Lightbown, 24; Thomas M. Colthart, 32.

NORTH MAIN STREET TO NO. 73—Otto Feenstra, 2; Mrs. T. M. McGoey, 22; Mr. and Mrs. W. J. Kearnan, 28; Thomas F. Devlin, 32; Mr. and Mrs. P. H. McGuinness, 30; John J. Rauth, 38; John Sohigian, 14.

NORTH MAIN EXTENSION AND FAIRLAWN TO SHAW'S CORNER—W. L. Carrick.

ROGERS BOARDING HOUSE—Mr. and Mrs. I. L. Rogers.

CUMMINGS BOARDING HOUSE—Mr. and Mrs. Harold Cummings.

A STREET—Samuel Lawson, 21; Winford L. Jones, 8.

B STREET—John W. Hyde, 13; Napoleon Guertin, 7; George S. Dyer, 10; Harold Orff, 33.

C STREET—James H. Jones, 31; Mr. and Mrs. R. K. Marshall, 38; Mrs. Elizabeth Alger, 10.

D STREET—Mr. and Mrs. David Savage, 13; Oscar Najarian, 45.

BORDER STREET—Fred Bosquet, 2; George Magrath, 4; Joseph Hetherington, 17; Charlie Nigohosian, 22; Francis G. Magowan, 41.

CASTLE HILL—Mrs. Robert Smith.

PRENTICE CORNER, QUOBIN ROAD—Mrs. Seth Williams.

BURDON DISTRICT AND PURGATORY ROAD—Edward H. Thomas.

CROSS AND PLEASANT—Earl J. Liberty, 33 Cross; Willard E. Burnap, 27 Pleasant.

WILLOW AND BROOK STREET—Mrs. Lewis R. Veau, 21 Willow; Mrs. John Redmond, 23 Willow; George Kizirbohosian, 34 Willow; Mr. and Mrs. George Gleason, 10 Brook; Walter D. Brown, 20 Brook.

EAST STREET TO NO. 90—Mrs. Ed. C. Driscoll, 33½; Miss Lizzie Houston, 53; Richard Piligoshian, 86.

EAST STREET EXTENSION AND GRANITE—Leroy Rollins, 110 East; Charles T. Noble, 115 East; Mrs. C. Lamb, 33 Granite.

JOHNSTON AVENUE AND BATON PLACE—Henry Benoit, 42; D. S. Frieswyk, 40.

EAST CHURCH STREET TO PLUMMERS CORNER—A. J. Brown; E. C. Colby; Mrs. Charles Paine.

THURSTON AVENUE TO CRAGGY PEAK AND RIVERDALE CEMETERY TO CENTER—Mrs. Juan Burnette.

STEVENS HOUSE—Mr. and Mrs. Frank Stevens.

PINE STREET—N. W. Wood, 12; Harry Bullock, 23; Mr. and Mrs. Artie M. Meader, 10; Miss Mary Sherlock, 34.

SPRING STREET—Mrs. John Welch, 19; W. O. Halpin, 20; Ed. J. Driscoll, 9; Stephan Machorian, 32.

PROSPECT STREET—Arthur Rienstra, 28; Emma Bosma, 28; Ernest A. Adams, 27; James Crichton, 74; George L. Searles, 16; James Sherlock, 34 Pine.

COTTAGE STREET—Bertram Dixon, 29; J. D. Leonard, 24; Mrs. H. I. Parkis, 99.

CHURCH TO GRANITE STREET—Frank Bates, 46; Charles M. Stuart, 44; Charles C. Sisson, 42; Mrs. E. W. Barry, 141; Howard C. Long, 74; Archie Magarhian, 170.

LINWOOD AVENUE—Albin W. Nelson, 111; Mr. and Mrs. James Shugrue, Mumford House, Mrs. Arthur Hall, 24; Mrs. James L. Aldrich, 30.

FLETCHER STREET—James E. Welsh, 46; Charles E. Harding, 8; Agnes Hackett, 34; Annie Thompson, 48.

ELM STREET, ELM PLACE, DOUGLAS ROAD—Mrs. Edith Casey, 10 Elm; George A. Tebeau, 19 Elm; Mrs. Thomas Miller, 1 Elm Place.
